Skills Summary

Skills: RESTful APIs, Agile/Scrum, CI/CD, Data Visualization, UX Localization, Bilingual (English/French)

Software: JavaScript, PostgreSQL, TypeScript, Python, Java, Tailwind CSS, GitLab, SourceTree, MATLAB, Autodesk

Education

McMaster University

September 2024 - April 2029

Bachelors of Engineering, Software Engineering, Co-op

Hamilton, Ontario

Awards: The McMaster University Award of Excellence (Faculty of Engineering), Dean's Honour List Award

Experience

Bell Canada

May 2025 - August 2025

Software Developer

Mississauga, Ontario

- Led Dark Mode system with reusable Vue.js + TailWind CSS components and theming for 400+ employees
- Spearheaded French localization, ensuring accurate bilingual UX to expand accessibility across teams
- Developed a web application integrating Confluence-Jira using AG Grids and Element Plus to boost workflow automation
- Implemented RESTful APIs with PostgreSQL + TypeScript, reducing manual queries by 40% by Agile sprints
- Utilized GitLab and SourceTree and streamline CI/CD workflows, reducing defects by 25% and 410 lines of code per demo

Berlin Packaging Toronto

July 2022 - August 2024

Accounting Intern

Toronto, Ontario

- Managed accounts receivables and tax certificates through 50+ monthly collection calls in English and French
- Resolved 90% of billing inquiries on first contact, minimizing aging revenue loss
- Digitized 1,000+ records on SyAcc then PeopleSoft, improving data retrieval efficiency by 40% and reducing storage costs
- Assisted in inventory checks in the triage room, reconciling discrepancies and ensuring accurate financial reporting
- Processed and organized 120+ financial client documents, ensuring compliance with accounting and audit standards

Code Ninjas

February 2023 - August 2024

Code Instructor (Sensei)

Brampton, Ontario

- Taught JavaScript coding fundamentals and advanced programming concepts to students from Level 1 to 10
- Graded 100+ coding assignments, provided debugging support, reducing coding error by 30% in future assessments
- Mentored junior coders, guiding them through self-assessments and hands-on coding projects
- Set up and maintained coding environments, consoles, and development tools for student learning
- Assisted in organizing coding workshops and fundraisers to promote STEM education, boosting participation by 50%

Projects / Extracurricular Experience

Ismaili Volunteer Corporation (IVC)

July 2020 - Present

Senior Volunteer Lead

Mississauga, Ontario

- Facilitates ceremonies, events, and outreach programs for youth
- Develops interactive coding challenges to reinforce programming concepts in Python, JavaScript, and C-Sharp
- Assists in debugging student projects, teaching problem-solving techniques and best coding practices

Airport Luggage System

September 2024 - January 2025

Project

McMaster University

- Designed a drawbridge and spool system with a rotary actuator, improving baggage handling efficiency by 30 percent
- Integrated QArm and Python software for baggage sorting, flight weight prediction, and check-in optimization
- Utilized Autodesk Inventor 2025, laser cutting, and 3D modeling while leading a team to meet project deadlines, demonstrating strong time management, collaboration, and problem-solving skills

Mini Autonomous Car

July 2024

Project

Brampton, Ontario

- Developed a 360° autonomous miniature car with 5 cm obstacle detection and self-redirection
- Engineered a gesture-controlled navigation system using Arduino Uno, ultrasonic sensor, and motor driver
- Implemented an autonomous movement algorithm in Arduino C, equipped with real-time obstacle avoidance
