EDUCATION

McMaster University

B.Eng in Software Engineering, Co-op; GPA: 3.98

Dean's Honour List (x2); The McMaster University Award of Excellence (Faculty of Engineering)

September 2024 - (expected) April 2029

Hamilton, Ontario, Canada

SKILLS

Languages: C#, Python, TypeScript, JavaScript, Java, Arduino C

Backend/Systems: ASP.NET Core (.NET 8), EF Core, PostgreSQL, REST APIs

Frontend: Vue 3, Tailwind CSS, AG Grid Enterprise

Hardware/CAD: MATLAB, Autodesk Inventor, Arduino, QArm

EXPERIENCE

Bell Canada | Software Developer | Mississauga, Ontario

May 2025 - August 2025

- Built a full-stack internal platform integrating Jira and Confluence into a custom IDE-style web tool, using Vue 3, AG Grid Enterprise, and Element Plus on the frontend and ASP.NET Core (.NET 8) on the backend.
- Designed backend services with EF Core, MediatR, AutoMapper, and FluentValidation against PostgreSQL 15, reducing manual queries by 40% across Agile sprints.
- Led Dark Mode and theming system using Vue 3 and Tailwind CSS, built with Vite and tested with Vitest, adopted by 400+ employees.
- Spearheaded French localization, ensuring accurate bilingual UX to expand accessibility across teams.
- Streamlined GitLab CI/CD pipelines within an Agile/Scrum workflow, reducing shipped defects by 25%, while using GitHub Copilot to accelerate development and Jira/Confluence/Outlook task management.

Berlin Packaging | Accounting Intern | Toronto, Ontario

July 2022 - August 2024

- Managed accounts receivable and tax certificates through 50+ monthly collection calls in English and French.
- Digitized 1,000+ records on SyAcc then PeopleSoft, improving data retrieval efficiency by 40% and reducing storage costs.
- Resolved 90% of billing inquiries on first contact, minimizing aging revenue loss.
- Processed and organized 120+ financial client documents, ensuring compliance with accounting and audit standards.

Code Ninjas | Code Instructor (Sensei) | Brampton, Ontario

February 2023 - August 2024

- Taught JavaScript coding fundamentals and advanced programming concepts to students from Level 1 to 10.
- Graded 100+ coding assignments and provided debugging support, reducing coding errors by 30% in future assessments.
- Set up and maintained coding environments, consoles, and development tools for student learning.
- Mentored junior coders through self-assessments and hands-on projects, boosting workshop participation by 50%.

PROJECTS

DeltaHacks 12 | Hackathon, Hamilton, Ontario

January 2026

- Built an iOS application in Swift & SwiftUI that transforms medical documents into actionable care plans within a 36-hour Agile sprint.
- Integrated Gemini LLM API to parse unstructured text, extract medications, and generate follow-up guidance.
- Implemented OCR pipelines (Vision, Textract, Azure) and clinical NLP APIs to process PDFs and images.

The Navio to | Wearable AI Vision Assistant, McMaster University

May 2025

- Co-designed a hands-free, AI-powered, vest-mounted navigation assistant with a client living with Usher's Syndrome as part of McMaster's IMPACT human-centered design initiative.
- Integrated Seeing AI and a low-latency Bluetooth interface for real-time object/text recognition ($\geq 90\%$ accuracy), engineering a custom mount and strap system that held tilt within 3° under movement.

Airport Luggage System | McMaster University

January 2025

- Designed a drawbridge and spool system with a rotary actuator, improving baggage handling efficiency by 30 percent.
- Integrated QArm and Python software for baggage sorting, flight weight prediction, and check-in optimization.

Mini Autonomous Car | Brampton, Ontario

July 2024

- Developed a 360° autonomous miniature car with 5 cm obstacle detection and self-redirection.
- Implemented a real-time obstacle-avoidance algorithm in Arduino C with a gesture-controlled Arduino Uno navigation system.
